

Compressed Air Piping Accessories - J Hooks

JH-EBC

JH-FC

JH-C

JH-CF

JH-TR

J-Hooks can be a great way of hanging compressed air piping, minimising screwing, drilling and fixing into steel/concrete structure, while also minimising installation time.

All J-Hooks are manufactured in galvanised steel, and feature a retaining spring clip to ensure the installed piping is kept secure.

J-Hooks are available for all piping sizes up to and including 100mm. Available in a variety of configurations, there will be a J-Hook to suit most installation methods.

Item Code	Description
JH-EBC	J-Hook, fitted with EBC, flange thickness 16mm max
JH-FC	J-Hook, fitted with hammer on flange clamp, flange thickness 16mm max
JH-C	J-Hook, fitted with C purlin clip, flange thickness 1.5 - 6mm
JH-CF	J-Hook, fitted with r/angle fixing bracket
JH-TR	J-Hook, fitted with rod/wire clip, suits M8, M10, M12 threaded rod

J-Hooks are available in the following sizes:
25mm, 32mm, 50mm, 75mm & 100mm
