

CEJN SafetyReel Electrical Cable Reels

Approved for the Australian Market (AS/NZS 3100:2022)

Part Numbers: 19 911 2318 & 19 911 2358

Key Features & Benefits

- Slow, controlled Cable retraction for enhanced safety
- Quick-Install wall or ceiling mounting bracket
- Accurate cable guiding prevents twists and kinks
- Soft stop-ball design reduces trip hazards included
- Thermal cut-off protection with easy reset
- Robust industrial-grade enclosed housing
- IP44 protection, with IP65 option for harsh environments

Designed to withstand the elements

The retractable cable reel is classified as IP44 as standard. That means that it is protected against solid objects and water splashing from all directions. A version with IP65 classification is also available. That means that the reel is completely dust-tight. It is tested to be protected against dust and other particulates and it can withstand low-pressure jets of directed water from any angle.

Model	Description
19 911 2318	17 MTR ELECTRICAL/CABLE REEL 240V/10A - 3PIN PLUG
19 911 2358	10 MTR ELECTRICAL/CABLE REEL 240V/10A - 3PIN PLUG

Ideal Applications

Automotive workshops, manufacturing, maintenance, engineering, mining support and industrial facilities.

Safer Power. Smarter Workspaces. Reliable Performance.
